SUMMARY

Senior Mobile Developer with 10+ years engineering healthcare and telehealth mobile applications in Swift and Objective-C. Delivered a 40% login performance improvement across 120 client installations and kept a mission-critical telehealth platform stable for 100+ clients during the COVID-19 surge. Proven track record leading large-scale legacy refactoring, SDK development, and cross-functional bug remediation on consumer-facing Mobile apps.

EXPERIENCE

System Analyst | Hexaware Technologies | May 2025 - Present | Remote

- Decomposed a 300-class monolithic Swift file into discrete class files using GitHub Copilot, eliminating persistent SwiftLint violations and accelerating PR review velocity for a 12+ developer team
- Led bug remediation for Citi's consumer-facing app, partnering with cross-functional teams to improve code quality and unblock development flow
- Reinstated a Git pre-commit hook dormant for 6 months, restoring SwiftLint enforcement and automated code-quality scripts — raising PR consistency across the entire development team

Amwell | December 2015 - September 2024 | Boston, Massachusetts

Lead iOS Engineer | November 2019 - September 2024

- Sustained platform stability for 120+ clients during the COVID-19 telehealth surge while simultaneously onboarding 30+ new clients in Objective-C and Swift
- Drove a 50% reduction in client-reported SDK bugs through direct troubleshooting and targeted fixes during critical telehealth support periods
- Cut bug-fix turnaround time by 60% for 90%+ of defects routed to the sustaining team, directly improving release cadence
- Resolved 30+ long-standing defects across iOS repositories, reducing customer-reported incidents by an average of 7 per week

iOS Engineer | December 2015 - November 2019

- Redesigned and migrated the iOS login flow from Objective-C to Swift, eliminating infinite loops and boosting performance by 40% across 120 client installations
- Engineered a standalone Objective-C enterprise iOS app enabling hospital staff to capture and upload images and videos directly to patient visit records, improving clinical documentation workflows
- Optimized network layer management and converted it to Swift, improving memory usage by 25% across all client installations
- Developed and implemented a secure LDAP login flow adopted by 200+ healthcare providers, improving authentication efficiency using Swift and REST API calls

- Audited and resolved visual inconsistencies across 20+ screens in partnership with a senior UX designer, delivering a consistent, polished UI for medical professionals across 120 client deployments
- Mentored 2 newer iOS developers through day-to-day guidance and code review, helping ramp their proficiency with the codebase and Swift best practices

Mobile Engineer | Mobiquity, Inc. | *October 2012 - November 2015* | Waltham, Massachusetts

- Engineered native iOS and Android enterprise apps for 5+ clients — including The Boston Globe, Wawa, and Medavie Healthcare — building iPhone experiences with native libraries across full project lifecycles

Co-Founder & Mobile Engineer | Deadmans Productions LLC | *April 2011 - December 2012* | Troy, New York

- Shipped five consumer apps to the App Store and Google Play, accumulating 100,000+ downloads across iPhone and Android in under two years

Web Application Systems Designer | DuPont Information Technology | *Summer 2007, 2008* | Wilmington, Delaware

- Redesigned a computer asset tracking system, reducing process cycle time by 92% (from 1 day to 2 hours) and delivering over \$200,000 in operational savings

EDUCATION

Bachelor of Science in Computer Science | Rensselaer Polytechnic Institute

SKILLS

- **Languages & Frameworks:** Swift, Objective-C, Core Animation, Core Data, Auto Layout, GCD, Flutter, SQLite, RESTful APIs, Firebase, Combine (Hexaware)
- **Architectures:** MVVM, MVC, SDK Development
- **Development Tools:** Xcode, Android Studio, IntelliJ, CocoaPods, GitHub Copilot, Claude Code, Git, JIRA
- **UI/UX:** SwiftUI (Personal Projects), UIKit, Storyboard, Sketch, Figma
- **Testing & Debugging:** Unit Testing, UI Testing, Instruments, XCTest
- **General:** CI/CD (various roles), Concurrency (Amwell, Hexaware), Legacy Refactoring, RESTful APIs, Accessibility (Hexaware, Amwell), Github, Jenkins, Server-Driven UI
- **Interpersonal:** Collaborative, Detail-Oriented, Problem-Solving, Leadership, Strong Communication, Technical Translation
